Bundama Case Study
Gibson Island Case Study

Hydropure is a company formed from over 20 years of manufacturing experience in the water treatment industry with a main focus on membrane separation system technologies. Our commitment is to provide the industry with the latest in components, systems and design consultation. High quality products, together with good value is our fundamental business objective. The Hydropure team has vast experience in membrane separation applications and system components integration. We know and understand the reality and the specific requirements and demands of the progressive desalination industry, in Australia, New Zealand and the South Pacific Region.

Hydropure Australasia Products

ROPV Membrane Pressure Vessels, Membrane Housings, Modules, Membrane System Components, Desalination Systems, Instrumentation, Electric Actuated Valves, Pressure and Systems Control Components, Victaulic Style Grooved Couplings, Ion Exchange Resins, Antiscalants, Cleaning Chemicals, UV Sterilisers, Multi Cartridge, Stainless Steel, FRP Filter Housings, Sea Strainers...

Supply and Distribution of Quality Water Desalination Products

-
Membrane Pressure Vessels (ROPV)

-
Reverse Osmosis Membranes (RO)

-
Nano Filtration Membranes (NF)

-
Ultrafiltration Membranes (UF)

-
Microfiltration Membranes (MF)

-
Membrane Based Systems

-
Vessel Skids & Pipework

-

Electric Actuated Valves

-

Instrumentation and Controls

-

Membrane System Chemicals

-

Multi Filter Housings & Cartridges
Consultation and Technical Services

-

Product Support and Technical Advice

-

Pre-Treatment System Design

-

Membrane System Solutions

-

Water Purification Data and Information

-

Water Pumps Installation and Configuration
