

HYDROPURE Success at Ozwater'10 Exhibition Brisbane showcasing the range of ROPV Pressure Vessels

Queensland was host to Australia's biggest water gathering, when Brisbane hosted Ozwater '10 - Australia's largest water conference and exhibition. Thousands of water sector professionals, researchers, consultants and environmental experts from Europe, Asia, the Middle East and the United States gathered in Brisbane to profile the projects, technologies and practices that featured in an increasingly challenging and demanding era of water management. The exhibition showcased the latest water industry science, products, services, technology and innovation. It was a 'must attend' event on the water industry calendar. There was much interest in the range of 8", 16" and 18" new high performance ROPV vessels. With major installations already achieved in Australia, ROPV is set to become a major vessel supplier for larger desalination projects proposed in the future.
